Square-1 Engineering, Inc. Expands Service via New Office in Twin Cities, Minnesota

Saint Paul, MN – 05.21.2024 – Square-1 Engineering, Inc. (Square-1), a leading medical device consulting firm, is excited to announce the opening of its newest office location in the Saint Paul, Minnesota area. This expansion marks a significant milestone for Square-1 as it continues to grow its presence in key markets across the United States, in particular the Twin Cities comprised of greater Minneapolis and Saint Paul (MSP).

The decision to establish a presence in MSP comes as a strategic move to better serve clients in the region and meet the growing demand for medical device engineering and compliance work. With its vibrant economy, thriving business community, and talented pool of professionals, the Minneapolis Saint Paul marketplace presents a wealth of opportunity for Square-1 to connect with new clients and partners.

"We are thrilled to be opening our new office in Saint Paul to support the MSP marketplace," said Travis Smith, Founder and Managing Director at Square-1. "This expansion underscores our commitment to providing exceptional engineering and compliance consulting services to medtech clients in this dynamic market. We are eager to collaborate with local companies, leveraging our Class II and III medical device expertise to drive success and growth in the areas of new product development, regulatory and compliance and manufacturing engineering."

Square-1's new office will be located in White Bear Lake, Minnesota, situated east just outside the heart of Saint Paul's downtown business district. The MSP area, in combination with greater Minnesota, represent a rapidly growing market for medical devices as evidenced in the 2023 designation of the 'Minnesota MedTech Hub 3.0' (MMT3.0), one of several dozen tech hubs recognized federally across the country which show potential for significant technology growth. According to Minneapolis Saint Paul Regional Economic Development Partnership, "Minnesota is home to 15,000 healthcare organizations which employ more than 469,740 Minnesotans, including the presence of the top 15 medical device companies in the world." The largest concentration of MMT3.0 can be found within the Twin Cities or Minneapolis Saint Paul (MSP) area.

In addition to enhancing client relationships, the Saint Paul office will serve as a regional hub for the Square-1's project management office, which helped to build the company's sterling reputation at its headquarters in Irvine, California.
